SCI Report Deliverables for SCALE

SCI provides the following types of deliverables for SCALE: dashboards and reports. All deliverable types are built upon the SCI framework packages for SCALE using Cognos.

SCALE Dashboards are created for use with Operational SCI. Dashboards can be utilized for either Operational SCI or Operational Analytics, although they are typically built for either version, based on the type of metrics included. Dashboards are interactive tools that provide visualizations of specific metrics, and relevant dimensions that can be used to research metric results.

Base SCI Report

Supply Chain Intelligence (SCI) provides four base reports.

You can access the report by navigating to Team Content > SCI Packaged Content > Reports > SCALE >

- All reports are interactive. You can click on visual elements to explore underlying data.
- Warehouse is the main filter for data to be displayed.

Refer SCALE Developer Hub to read – Custom Reports

Outbound – Shipment Status report

Provides a high-level view of the status of outbound shipments, helping users quickly identify shipment status and its metrics.

- Displays the count of the shipments grouped by the trailing status.
- For Closed Shipments, only today's shipments will be considered.

Report Filter

The report is filtered using the Warehouse.

 **What's New:** To read about what's new in Reporting, click [More Info.](#)

 Edit        HTML

Prompt

Provide values for the report you are about to run.

p_warehouse

 

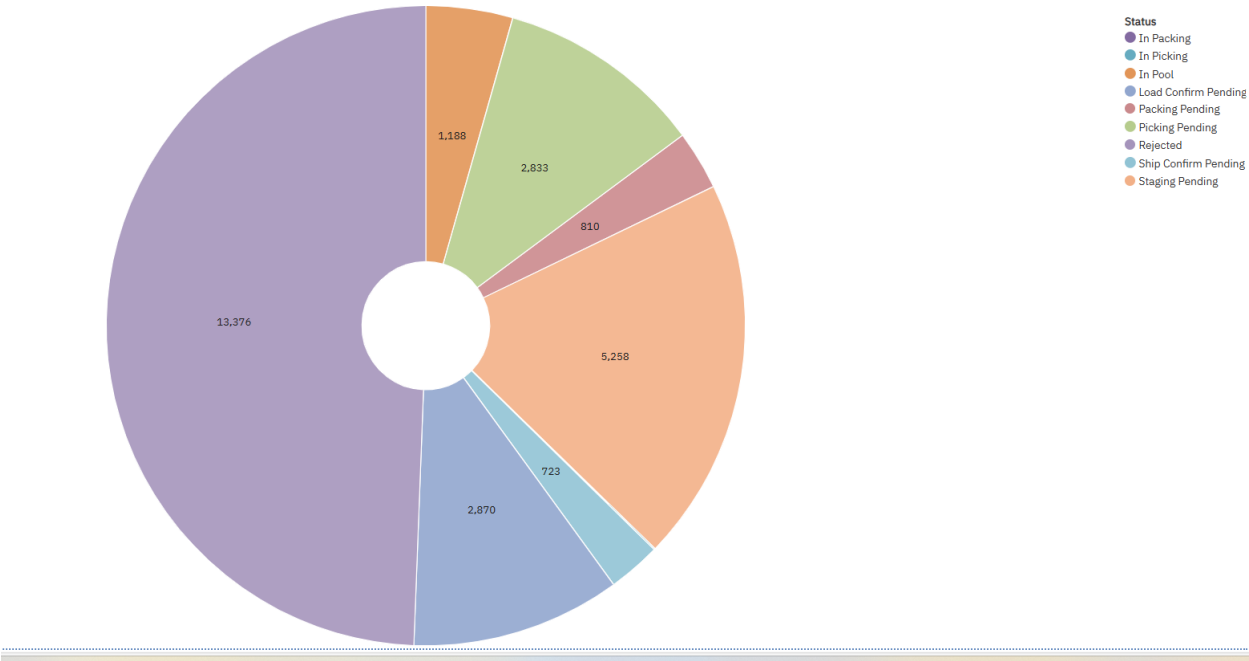

Report

The Donut chart is displayed with the chart categorized with different shipment statuses and their counts.

- Each segment of the donut chart represents a different shipment status.
- The number reflects the number of shipments in that status.

OPERATIONAL SCI DELIVERABLES FOR SCALE

Double-click on any segment of the chart to **drill down** into a more detailed report for that status.

- In Pool status: Opens Planned Shipment Insight screen.
- Other statuses (example: Packed, Shipped): Opens Shipment Insight screen.

Outbound- Shipping Status

Date:May 28, 2025 7:39:29 AM

[Back](#)

Status	Shipment Warehouse	Shipment Count
In Packing	"Wilt's" 3PL	19

Click on a status such as **In Packing** to open the related shipments in the **SCALE application** directly.

Outbound – Shipment Line Fill Rate by Week

This Line chart measures the percentage of shipment lines that were successfully shipped in full during a given week, relative to the total number of shipment lines requested to be shipped that week.

Prompt

OPERATIONAL SCI DELIVERABLES FOR SCALE

Prompt

Provide values for the report you are about to run.

p_warehouse

*

p_warehouse

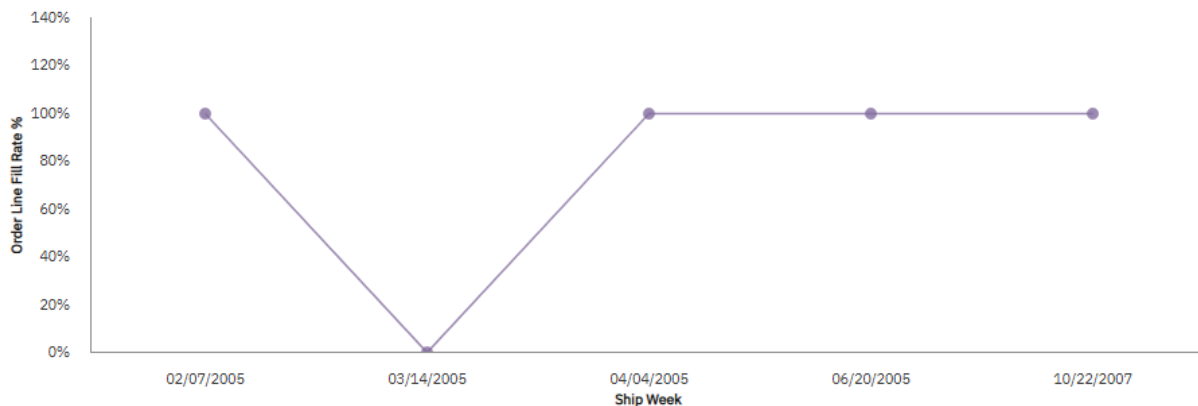

Report

The report displays the following details.

- X-axis: Scheduled Ship Date
- Y-Axis: Ship week
- Line Value: Fill Line Rate (%)
- Line Color: Represents Warehouse

By Default, View fill rate trends over the **current week and previous 3 weeks**.

Calculation - Shipment line Fill rate = [(Number of shipment lines where total qty = requested qty)/ (Total number of shipment lines)]*100 for Shipping load trailing status 900.

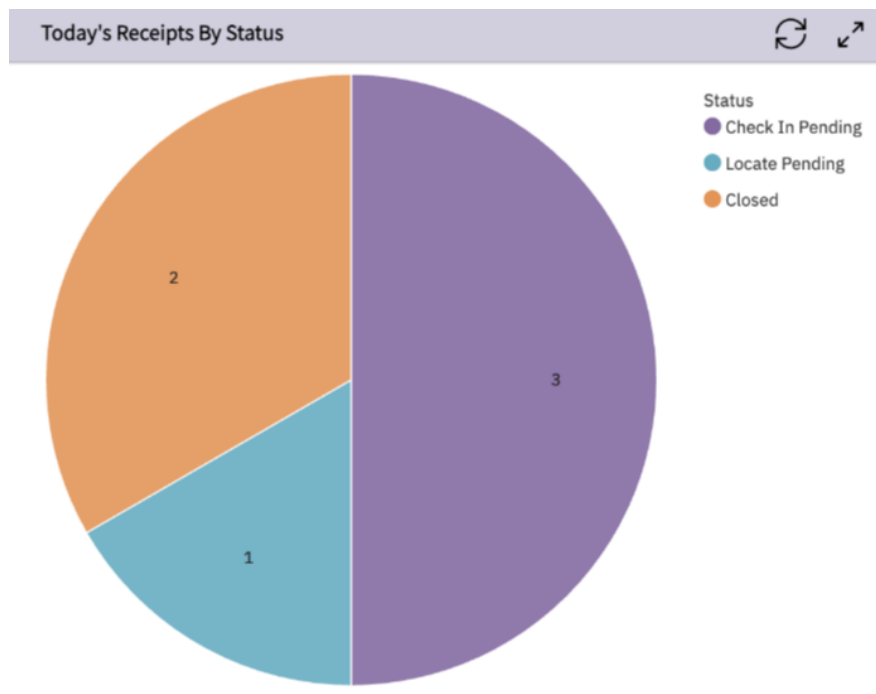

Inbound – Today's Receipt by Status

Displays the inbound receipts that are scheduled and processed today, grouped by their trailing status

.Prompt

- Warehouse
- Locale

OPERATIONAL SCI DELIVERABLES FOR SCALE

- Click on any **status category** to open the **Receipt Insight** screen.
 - Automatically filters the data to show **only today's receipts** with the selected status.
- For example, clicking on **Check-in Pending** will display all receipts in that status for today in the SCALE application.

Inbound - Today's Receipt By Status

Status	Receipt Warehouse	Today's Receipts
Check In Pending	MN	7

Click to View the Receipts with Check-in Pending status in the SCALE Application.

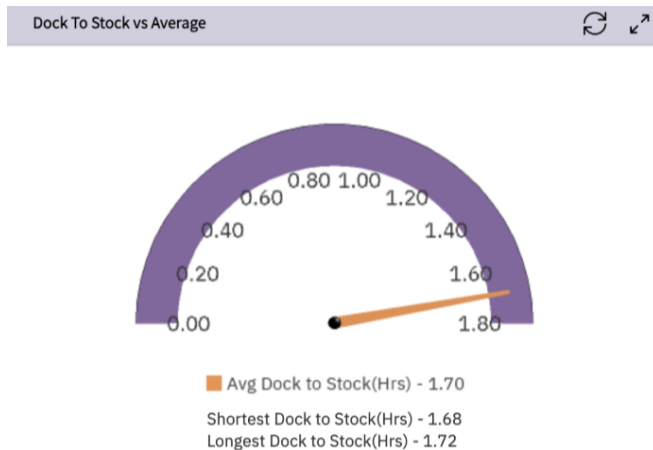

Inbound – Dock to Stock vs Avg

The time it takes to check in and putaway an entire receipt

Prompt

- Warehouse Selection.

OPERATIONAL SCI DELIVERABLES FOR SCALE

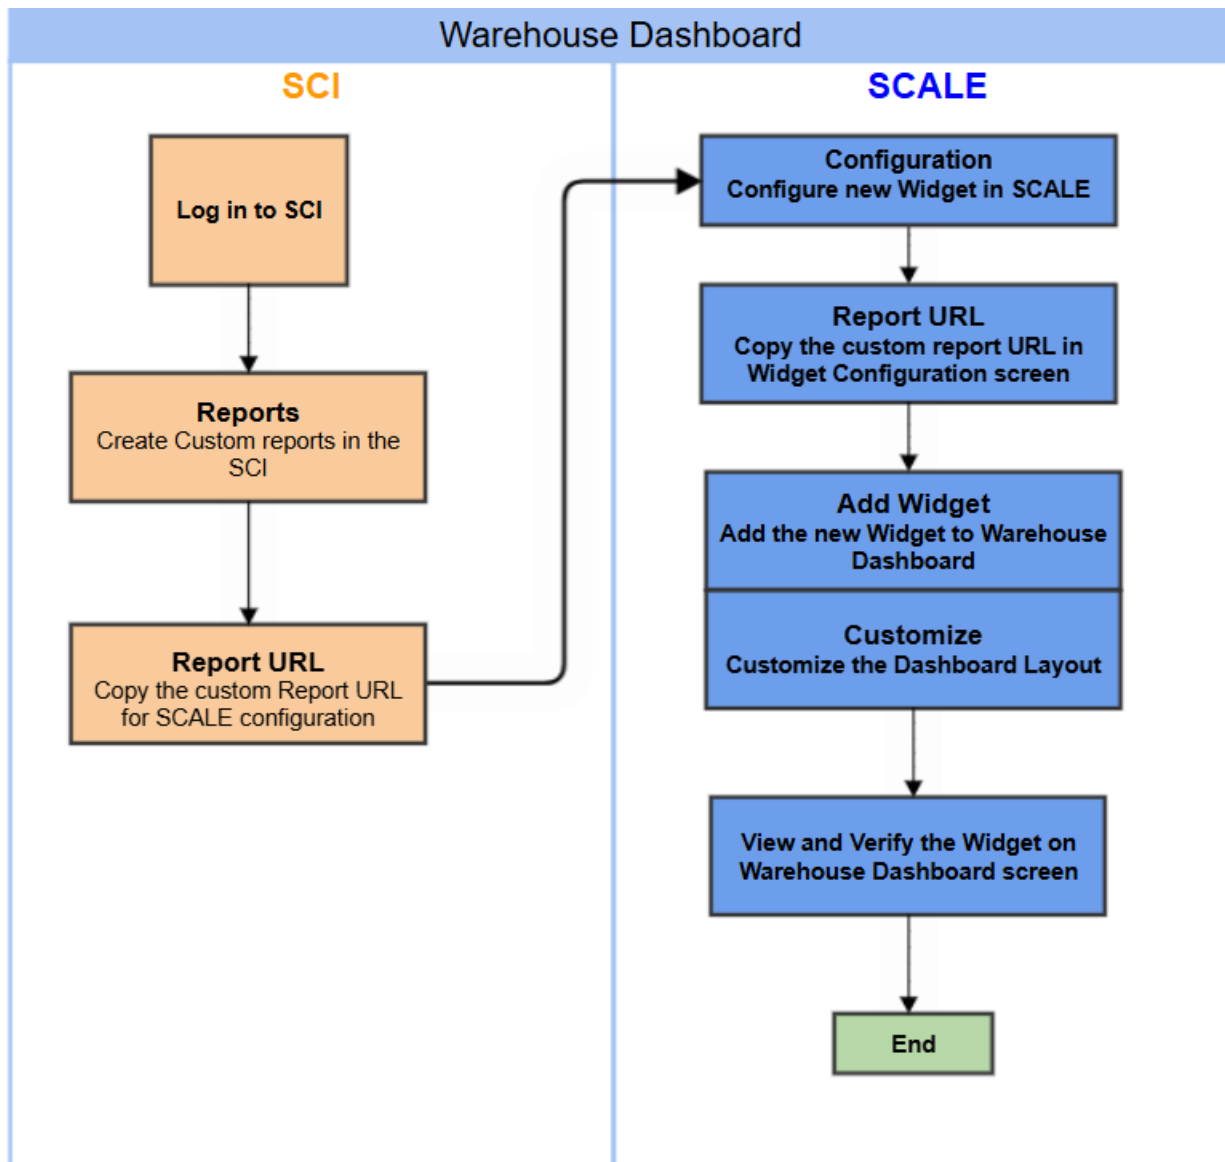

- **Dock to stock time** = Receipt header's close date minus receipt header's start unitized (check-in) date time for receipts with a close date equal to today's date.
- **Shortest dock to stock** = Shortest time from dock to stock for a receipt with a close date equal to today's date.
- **Longest dock to stock** = Longest time from dock to stock for a receipt with a close date equal to today's date.
- **Average dock to stock** = Sum of all the dock to stock times (close date - start unitize date time) divided by the number of dock to stock times for receipts with a close date equal to today's date.

SCI and SCALE Custom Integration Flow

Follow these steps to integrate and display SCI reports within the SCALE Warehouse Dashboard.

- Create a custom report in the SCI (Supply Chain Intelligence).
- Configure the SCALE application by linking the custom report using its URL.
- Add the report to the Warehouse Dashboard screen.
- View the report directly from the Warehouse Dashboard.
- Customize the Warehouse Dashboard screen as needed for better visibility or layout.

OPERATIONAL SCI DELIVERABLES FOR SCALE

1. Create a Custom Report in SCI

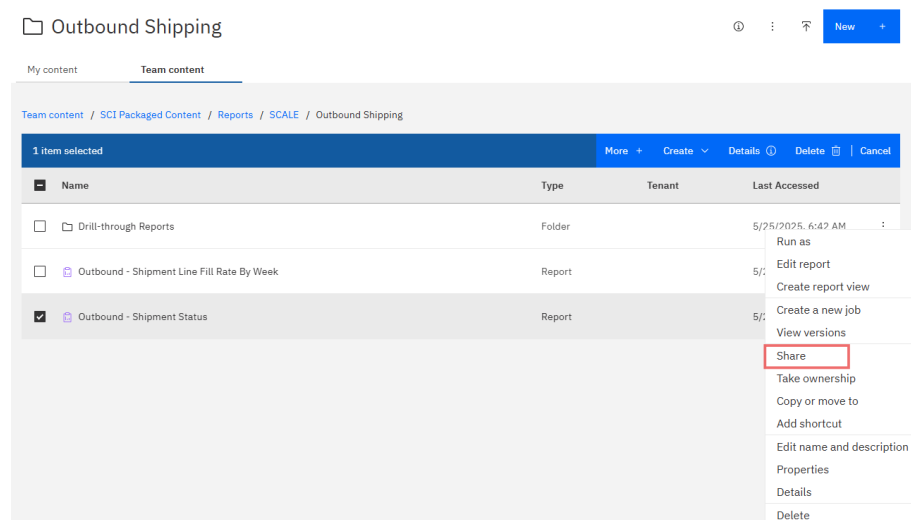

Follow the steps to create a custom report in SCI using the base SCALE reports.

- Log into the SCI (Supply Chain Intelligence) application.
- Create a custom report in SCI.

2. Getting Widget URL from SCI

Obtain the shareable URL of the SCI report for embedding into SCALE.

- In the SCI interface, go to the required custom report. (For example: Outbound- Shipment Status)
- Right-click on the report and select **Share**.

- The Share dialog box is displayed.
Under the **Link** section copy the URL.
- Note: This URL will be used as a parameter in Widget Configuration.

```

3. Configure the Widget in SCALE

Set up a new widget in SCALE for using the custom SCI report in the Warehouse Dashboard.

- Navigate to **Dashboard Widget** configuration.
- Click the **Create New Dashboard Widget** button.
- Provide the following information:
 - Widget ID: Use the name of the report (Example, Outbound- Shipment Status).
 - Description: Brief explanation.
 - Widget URL: Paste the custom report URL copied in Step 2.
- Save the widget configuration.

Note: This step connects the SCI report to SCALE's dashboard system.

4. Add the Widget to the Warehouse Dashboard

Follow the steps to enable the new widget on the warehouse dashboard.

Navigate to the Warehouse Dashboard within the SCALE application.

- Click **Customize** to open the dashboard editor.
- Go to the **Widgets** tab.
- Use the search bar to find the widget by the ID or name you created earlier.

OPERATIONAL SCI DELIVERABLES FOR SCALE

- Enable the **"Add to Dashboard"** toggle for the widget.
- Click **Save** to apply changes.

The screenshot shows a 'Not Added' section with a search bar. Below the search bar is a section titled 'Outbound' with a toggle switch for 'Add to Dashboard'.

5. Customize the Warehouse Dashboard Layout

You can customize the layout of the dashboard by rearranging the widgets as required.

- Users can re-arrange the Widget as required.
- Drag and Drop the widget to change the layout.
- Click Save.

The screenshot shows the 'Dashboard customization' window with the 'Widgets' tab selected. It displays a grid of widgets that can be added to the dashboard. Each widget has a title, a description, and an 'Add to dashboard' toggle switch.
